

COPERNICO BIFORMAT

Base from 203cm up to 305cm.

Designed for the most demanding, Copernico biformat offers 2 screens in 1. The box contains 2 motors horizontally arranged with 2 different fabrics which work independently. This feature offers therefore multiple combinations.

It is possible to install two fabrics with different video formats, e.g., 21:9 and 16:9, or, if placed in front of a window, an obscuring fabric and a projection one. With two counterposed fabrics, it is possible to project on both sides or on a front-projection fabric and on a rear-projection one. In a conference hall it might be useful to have one of the fabrics reproducing the logo of the hotel or the congress centre in digital print plus a projection fabric to be rolled down only when needed.

SCREEN CHARACTERISTICS

- double, independent motorization
- possibility to interface with home automation systems
